After receipt, the PAB will work with SDPD and the City to determine prioritization. Prioritization criteria may include, among others:
 - Broad impact of technology vs. narrow;
 - Relationships between software tools as it appears technologies appear in different contexts;
 - Target surveillance v. mass surveillance.
- Representatives from the San Diego Police Department were present to provide a presentation of their use of body worn cameras and evidence.com technology. These representatives also respond to questions from the Board members. All board members present were given time to engage in questions and responses.
